# "Home Control" Is Sought By Board

A four-point legislative program designed to give county commissions additional revenue and more "home control" is being pushed by the State Association of County Commissioners.

Palm Beach County, according to Commission Chairman Lake Lytal, has endorsed the proposed legislative acts which will:

Give the county commission control of the 7th cent gasoline tax for road construction. Return the three-cent cigarette

tax now collected outside municipalities, to the counties. The mu-nicipalities get it now.

Have the state assume cost of public defenders and increase the juri-diction of the defenders to handle additional cases which would eliminate county's having to hire special counsel to work in

some of the courts.

Right of way appraisals, the commission said, showed that \$18,000 was in order to move the building and \$22,000 was set as the price if the Chamber building was demolished and a new one constructed.

The State Road Department, the commission said, allowed the Chamber the \$22,000 figure set for demolition, but the Chamber elected to move the building instead.

The new site, made available by the City of West Palm Bach needs \$5.400 worth of improvements before the building can be put into place. The Chamber asked the county to foot the bill, since the State Road Department said the issue is closed as far as its concerned.

The commission this week voted to refer the matter to its legal department to determine if some arrangements can be made to cooperate with the Chamber of Com-

# New 34% interest on U.S. Savings Bonds

The Treasury explains why the new ones you buy and the ones you own now are better than ever

Q: How does the new 33/4% interest rate benefit me?

A: With Series E Bonds, the rate turns \$18.75 into \$25.00 fourteen months faster than the old rate. Your savings increase faster, because your Bonds

Your savings increase faster, because your Bonds mature in just 7 years, 9 months.

With Series H Bonds, the 10-year maturity period stays the same but more interest is paid you each six months. With both E and H Bonds the new rate works out to 2½% for the first year and a half; then a guaranteed 4% each year to maturity.

- Q: When did the new rate become effective?
- A: June 1, 1959.
- Q: Does the new rate change the Bonds I bought before June 1, 1959?
- A: All older E and H Bonds pay more now—an extra
  % from now on, when held to maturity. The increase takes effect in the first full interest period
  after June 1.
- Q: Will the Bonds I own automatically earn their new
- A: Yes. You don't need to do a thing—just hold on to your Bonds.
- When my E Bonds mature, will they keep on earning interest?
- Yes. An automatic 10 year extension privilege went into effect along with the new interest rate. This means your B Bonds will automatically keep earn-ing interest after maturity.
- Q: With the new interest pate, should I cash in my old
- As No. The automotic left, increase makes it unnecessary—and in almost every case it is to your advantage to retain your present Bonds.

  6 How are settles H Bonds different from series B
- Bonds?

  The chief difference is this: You buy H Bonds at full face value and the interest is paid by Treesury

check every six months for the life of the Bond. You buy E Bonds at 75% of face value and the interest accumulates to maturity. H Bonds provide income for living expenses, while E Bonds build a nest egg for the future. That's why many retired people hold H Bonds and families saving for, say, a child's education, buy E Bonds.

- Q: In what denominations can I buy series E and series H Bonds?
- At Bonds: \$25 (cost \$18.75), \$50 (cost \$37.50), \$100 (cost \$75.00), \$200 (cost \$15.00), \$500 (cost \$375.00), \$1,000 (cost \$75.00), \$1,000 (cost \$75.00), \$10,000 (cost \$75.00), \$10,000 (cost \$75.00), \$10,000, \$500, \$1,000 and \$10,000. They are priced at face value.

- Q: How safe are U.S. Savings Bonds?
- A: Savings Bonds are an absolutely riskless way to save. The United States Government guarantees the Eash value of your Bonds will not drop, that it can only grow.
- Q: What if my Bonds should be lost, stolen or de-
- As You can't lose. Every Bond purchased is recorded by the Treasury. If anything happens to your Bonds they are replaced—free.
- Q: Where can I buy Bonds?
- & Where can I buy Bonds?

  & Buy E Bonds at any bank—it takes only a few minutes. Buy them automatically through the Payroll Savings Plan where you work. This Plan means you can have any amount you name automatically, deducted every payday. The Bonds you buy by installments are delivered to you automatically, too. Your bank will take your order for H. Bonds.
- Q: How do I help strengthen America's peace pow when I buy U.S. Savings Bond?
- As Peace costs money—money for military strength and for acience. And money saved by individuals helps keep our economy sound.

#### Recreation Area Sought For Glades

Possibility of a new recreational area for Glades residents was discussed this week by the County Commission.

Commissioner E. W. Weaver said that an area on the Miami Canal near Lake Harbor could be obtained for park purposes and that assistance in development of the county's portion of the land, could be secured from private in-

Weaver, who was authorized by the board to check further into the project, told the board that some 40 acres of land is available, from the state. He added that these private interests are willing to purchase a part of the land and will fill county property at the same lime on the land and will fill county property at the same time as the private land is being filled for development, with-out cost to the county.

The film, Weaver, said is also in-

terested in building a water treat-ment and sewage disposal plant large enough to serve the Lake Harbor community.

Weaver is slated to report back to the commission next week.

Early and mid-season control with Phosdrin hits insects hard, cleans them up fast,

Close-to-harvest insect control with Phosdrin gives you an unbeatable way to insure crop quality.

# Now, Phosdrin is an all-season insecticide

-vegetable growers are using its hard-hitting control and fast disappearance in every spray.

The special effectiveness that has always made Phosdrin\* Insecticide profitable for late-season use is now protecting vegetables throughout their growth. Here's why:

THE 5- to 7-day spray schedules authorities The 5- to /-uay spray scaled the role now recommend have changed the role of Phosdrin. With its rapid speed of kill and near-perfect insect control, Phosdrin is extremely effective in the new short-interval spray schedules.

Also important in the new programs: Phosdrin is competitive on a cost per acre basis and its fast disappearance eliminates problems.

#### Insects and residues both vanish

A Phosdrin spray cleans up a broad spectrum of insects in a matter of minutes-aphids, mites, loopers, worms, almost all destructive pests attacking vegetables. Because control is so thorough, insects can't build to damaging levels between sprays. And, of course, accidental drift to a nearby field also disappears

Phosdrin makes it easy to avoid problemsall season and close to harvest. It's gone from the field a few hours after application.

#### Complete control is economical

Phosdrin alone, protects lettuce; tomatoes, beans, peppers, celery, watermelons, eggplant and many other vegetables. There's no need to add another insecticide and raise costs... even if resistant insects are present. Phosdrin stops them too. And it offers a wide margin of safety to leaves and fruit of insecticidesensitive crops like cucumbers and lettuce.

A little Phosdrin goes a long way. As little as ¼ pound per acre is all it takes to end the. damage of most vegetable insects. Dosage rates seldom exceed 1/2 pound per acre. Check

into costs and consider the overall protection Phosdrin gives you and your crop, and you'll see why it pays to use Phosdrin all season.

Phosdrin is available from your local insecticide dealer under many well-known brand names, or as a product of Shell. In liquid or
